OUR COMPANY

Big Brothers Security Solutions has been providing security services since last 8 years. We are specialized in installation and building integrated security solutions for both Public and Privately held companies, Retail, Transport, Banking and Finance, Healthcare organizations, Educational facilities and Government agencies. With a client base as diverse as ours, we are often faced with the challenge of finding the perfect security solution to meet the needs of our client. This is a challenge we face enthusiastically. With our strong technical background, understanding of networking and integrated security solutions it enables us to build sophisticated surveillance applications that are available anytime and from anywhere.

OUR TEAM

We at Big Brothers Security Solutions, provide installation by professionals of the product that will provide you years of security for your business and home. We have a dedicated security team of field Technicians, Sales personnel, Engineers and Administrative support staff that work together seamlessly to ensure that our clients are kept abreast on all aspects of their projects and those projects are completed within all established timeframes. To make certain that our clients are receiving outstanding support and service. Our technical team continues to provide outstanding support and service during all phases of our clients' projects, from design to installation and beyond. Our team offers 24/7 hours support.

OUR SERVICE

Considering the variety of risk, you face as a business, it is of first importance that your security sensitive to every threat, and fully integrated to provide a complete web of security. We at Big Brothers Security Solutions do installation and maintenance of CCTV surveillance systems, Access control systems, Security Alarm entry and Swipe card systems, Intrusion Alarm systems, Vehicle Tracking systems, Auto Gate Systems, as well as Telephone PABX systems, Audio Systems, Structured cabling and Wired / Wireless network.

WHY INTEGRATED SECURITY SYSTEM?

Today's security picture is changing rapidly. Risks are increasing. New threats are emerging, protecting your assets— customers, employees, property and data—is still at the core of your security strategy but you're now expected to reduce risk, mitigate liability, protect revenue streams, and reduce operating costs and insurance premiums. In this age of heightened security concerns, you need a partner who understand your daily challenges. We have the industry expertise to provide security solutions that comply with emerging standards. We have a broad product offering to fit your current and future security needs. Integrated security systems reduce installation, training, maintenance and manned guarding costs.

BENEFITS OF INTEGRATION

- Flexibility
- Effectiveness
- Convenience

OUR MISSION

Our goal is to provide peace of mind by offering customized integrated security solutions. We strive to partner with our clients in understanding their business aspirations to ensure fulfillment of their current and future plans and goals. We deliver quality at every level of our organization for the benefit of our customers.

CCTV SURVEILLANCE SYSTEMS

We provide the most up to date & cost-effective security solutions for all your CCTV needs, with a variety of cameras & control equipment from leading manufacturers. We offer state of art technology for Buildings, Towers, Offices, Villas, Shopping Malls, Factories, Hotels, Government buildings, Community Surveillance etc. Our product range comprises of Analogue Cameras & IP Cameras, Fixed & PTZ Cameras, DVR & NVR's and Remote Monitoring facilities.

When selecting a security camera for your home or business there are a few important things to consider before you make your purchase like what are your security application needs? Do you need indoor or outdoor cameras? How many security cameras do you need for your location? Do you need to see a high level of detail in your video? Do you want a wired or wireless camera? What is the best form factor for your security application? Choose the best cameras to monitor high-traffic, high-risk areas 24/7.

Installing high-quality, reliable security cameras enable you to keep an eye on the interior or exterior of your business or house and provide peace-of-mind security. Video surveillance camera range includes indoor / outdoor cameras, IR night vision, dome, bullet and PTZ cameras, IP and megapixel options.

- Network IP Security Cameras
- HD Analog Security
- Digital Video Recorders
- Hybrid DVRs
- Network Video Recorders

ACCESS CONTROL SYSTEMS

We have vast experience in the area of access control / door entry systems and can recommend a suitable system from the many we regularly install. Whether it is to stop unwanted intruders passing the reception area unnoticed or restricting access to certain areas within a building, timekeeping and payroll purposes, we have the products to suit your circumstances. Our access control / door entry systems can be push button, keypad coded, biometric or operated using an electronic fob and scaled from single installations to major building systems incorporating multiple doors/apartments.

Why access control?

Employee theft, unauthorized access, visitor management, violence in the workplace, - the list goes on.

Benefits of access control

- Easy control of access points - doors, gates, parking garages, elevators, production areas, data centers
- Flexible access scheduling
- Customized forms and templates for editing and managing personnel access rights
- Effective identification through photo badging or biometrics
- Create an alarm on detection of any tampering

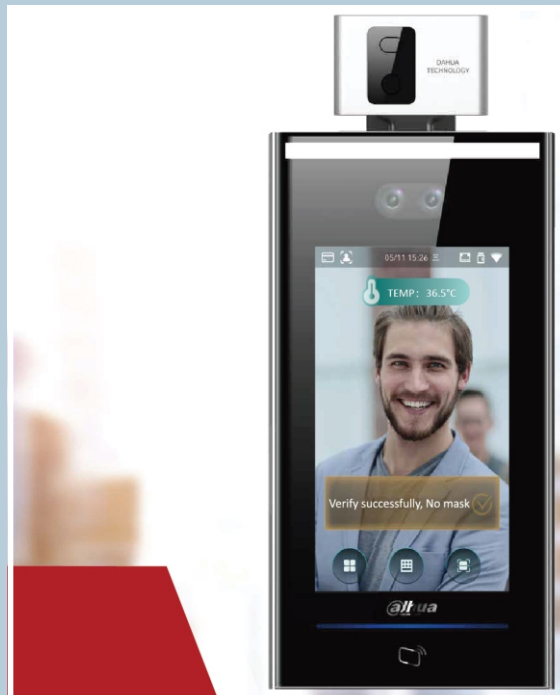

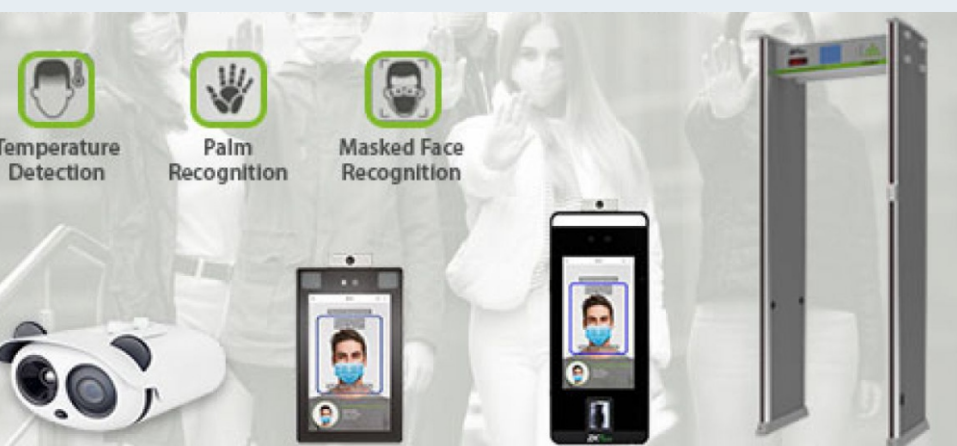

INTRUSION ALARM SYSTEMS

Intrusion alarm are systems designed to detect intruder or unauthorized entry into your premises. An intrusion alarm consists of control equipment and sensors that activate an audible siren when there is break in. Intrusion alarm systems may also be combined with CCTV surveillance systems to automatically record the activities of intruders and can be linked to access control systems for electrically locked doors.

System range from small, self-contained noise maker, to complex, multi area systems with computer monitoring and control. Due to advance in technology some of the best systems on the market are now wireless for easy installation with minimum disruption to your premise.

Get a complete security overview for

- ✔ Motion detection
- ✔ Duress
- ✔ Cabinet tamper
- ✔ Arm/disarm zones
- ✔ Glass break
- ✔ Digital dialer integration

AUDIO / VIDEO SYSTEMS

Audio/Video intercom system work for single family homes, offices, apartment buildings and residential communities. In this system you never have to wonder who is at your front door again. Not only does it give you and your family piece of mind and extra security, you can also use this as an in-home intercom system to communicate from room to room with our state-of-the-art monitors.

We offer installation of Audio Intercom, Video intercom, Intercom with door lock and security features, Intercom solution for high rise buildings.

VEHICLE TRACKING SYSTEMS

We at Big Brothers Security Solutions, install remote tracking, monitoring and management of fleets of vehicles, containers and people. We provided complete solutions for real-time GPS fleet management and vehicle security applications, personal tracking, merchandise tracking, containers tracking and management and an online application. This tracking systems saves fleet running costs, increases in productivity and improved customer service. Vehicle information can be viewed on electronic maps via the Internet or specialized software. At GPS Tracking, we help companies with vehicles save money on fuel and labor costs. Providing GPS tracking solutions that are customized for your business and tailored to your budget.

Benefits of Tracking systems

- Reduce labor costs by increasing employee productivity
- Reduce vehicle fuel cost and maintenance costs
- Reduce vehicle emissions

- Vehicle theft recovery tool

BARRIER GATE

Big Brothers Security Solutions in association with DAHUA is leading brand for the vehicle barrier gate system supplier in Malaysia with a good spare part, repairing and warranty support. Barrier gate can be integrated with car parking access control system or car park ticketing system. Boom barrier arm will be lifted to grant access upon verification from the control system. Big Brothers Security Solutions car boom gate is compatible with most vehicle card access control and automated parking ticket system in Malaysia. Big Brothers Security Solutions barrier gate system in Malaysia design is optimized to offer a reliable yet affordable solution for residential condominium, apartment, commercial building and industrial factory usage.

AUTOGATE

An auto-gate is an installation done on a gate so the opening and closing of the gate can be carried out automatically from a distance using a remote-control button. Installing an auto-gate at your home is more about convenience rather than indulgence because there are many circumstances that require you to open a gate from a distance rather than manually open a gate yourself. First and foremost is a safety reason because a split second to open the gate could expose you to the dangerous element such as robbery and petty theft. On top of that you can save yourself from all the trouble and be safe from inside the car straight into your parking space and you can close the gate behind you automatically and effortlessly.

PABX TELEPHONE SYSTEMS

For the love of the plain old telephone systems, many a people prefer to maintain their PABX systems even now. With the advent of new technology and products, finding support and spare parts for the old systems become a dreadful experience. More, personnel with knowledge and experience on such systems are hard to be found. We, with years of experience and knowledge that we have, do not leave the customer haphazard during a technical breakdown. Being able to have been the stockiest partner for popular PABX systems makes us a preferred choice of our customers when it comes to an upgrade or a breakdown.

IT INFRASTRUCTURE AND NETWORKING

Most likely, the network you use now and, in the future, will be some form of Ethernet. It's the most common network type, and it's the de facto standard in networking. When planning a network, we need to think fast. Network technologies considered cutting edge only a few years ago are now becoming viable options for network upgrades. The shift is to Gigabit Ethernet, 10-GbE, SANs (storage area networks), and even 40+Gbps connections for enterprise and data center backbones. We build and manage the key elements of your network with caution and care. Our proven skills and expertise help us deliver the most competent and future proof solutions to you.

We are poised to offer you world class solutions in

- ✔ *Smart Racks and Cabinets*
- ✔ *Servers and Storage*
- ✔ *Switches and routers*
- ✔ *WiFi infrastructure*
- ✔ *Wired infrastructure*

STRUCTURED CABLING

Big Brothers Security Solutions has taken its expertise in providing quality structured cabling solutions, and has developed a reliable, innovative solution for the professional environment. Our cabling solution products satisfy the need for a fast, dependable, yet flexible system to accommodate today's changing voice, data and video requirements. Our experienced and dedicated team provides an 'end to end' service from design to implementation. We design and build cabling infrastructure systems that support multiple voice, data, video and multimedia systems. We will help you evaluate, design and install the optimum integrated system for your company. We provide infrastructure cabling of the highest quality and standards, to ensure that your networks run at full wire speed and maintains the highest possible availability. A structured cabling system is the lifeblood of your organization. If done right, it will serve you well for years. If not, your organization's growth and bottom line can suffer.
